

Watch the videoclip by Omnia and fill the gaps with the words you hear.

Deep within the shadows, I'm the hungry
wolf you **fear**

But I can see that you are the only evil
creature here

Before you *came* we lived in peace but you
brought us death

I sing my pain up to the moon but
it's a waste of breath

Because I don't speak human, you can't
understand a word *I'm saying*

I don't speak human, you can't understand
a word *I'm saying*

Upon a wing, a flying thing, to you I seem so
small

But I **look down on** what you've *done*, my
raven's eye sees all

You people like a cancer grow, destroying
all you see

And 7 billion mutant monkeys **won't listen**
to me

Because I don't speak human, you can't
understand a word *I'm saying*

I don't speak human, you can't understand
a word *I'm saying*

I won't run this human race, your war is not
for me

I hear the voices from the wild, they *taught*
me how to see

It's us who are the strangers here and we
don't own the land

My words they **fall upon deaf ears**, cause
no-one *understands*

Because I don't speak human, you can't
understand a word *I'm saying*
I don't speak human, you can't understand
a word *I'm saying*

Now you tell me that I'm wrong and
animals don't *feel*

You say the earth is not alive and only we
are real

You try to **tell me to behave**, that I must act
like you

But I just stick my fingers in my ears and
say: Fuck you

'Cause I don't speak human, I can't
understand a word you're *saying*

Because I don't speak human, I can't
understand a word you're *saying*

I don't speak human, I can't understand a
word you're *saying*

Because I don't speak human, I can't
understand a word you're *saying*

I don't speak human, I can't understand a
word you're *saying*

Drag the words on the right to complete the sentences: ☼ ☺

The eagle _____ its chicks some fish.

won't listen

It's so windy, that she can't hear what _____.

came

(not) as...as

all-seeing /sharp fangs/ look / ravens / threatening/ with / wolves / their

than, more

How many *similarities* and *differences* are there between them?

Mark the sentences you have created with 'S' or 'D'.

Can you think of any more sentences?

Decide whether the sentences are true or false

Ravens can pretend to be other animals. **True** **False**

Wolves normally don't like outsiders. **True** **False**

Ravens can live longer in nature than with humans. **True** **False**

They don't eat any plants. **True** **False**

Fill the gaps while you're reading the texts

Evolutionarily speaking, the deck is stacked in the raven's favor. They can live in a variety of habitats, from snow to desert to mountains to forests. They are scavengers with a huge diet that includes fish, meat, seeds, fruit, carrion, and garbage. They are not above tricking animals out of their food—one raven will distract the other animal, for example, and the other will steal its food. They have few predators and live a long time: 17 years in the wild and up to 40 years in captivity.

Wolves communicate with one another by vocalizations, scent-marking, and visual signaling, such as facial expression, body position, tail position.

Howling is another form of communication. It helps the pack stay in contact with one another. There is also evidence that howling strengthens social bonds among pack members. Wolves mark their territory with urine and feces to inform neighboring packs of their presence and to let them know that they should not intrude. Intruding packs are often killed by resident packs, yet they are accepted in some instances.

In captivity, ravens can learn to talk better than some parrots. They also mimic other noises, like car engines, toilets flushing, and animal and birdcalls. Ravens have been known to imitate wolves or foxes to attract them to carcasses that the raven isn't capable of breaking open. When the wolf is done eating, the raven gets the leftovers.
