Part 3

Read the text below and answer questions 17 to 24.

The Traditional Malaysian House

The traditional Malaysian house, also known as a "*kampung* house" or "rumah *kampung*," embodies the rich cultural heritage of Malaysia and reflects the lifestyle of its people. The design of the traditional Malaysian house give priority to harmony with nature and takes into account the hot and humid climate of the region. The houses are often constructed on stilts, which serve several purposes. In addition to providing ventilation, elevating the house above the ground helps to cool the house and protect it from flooding during heavy rains. Furthermore, stilt houses also minimize the impact of insects and wild animals that could enter the living spaces.

Traditional Malaysian houses are primarily constructed using natural materials found locally. Additionally, the main components of these houses are usually timber and bamboo, which are abundant in the region. The timber frames provide a sturdy structure, while bamboo is used for walls, flooring, and sometimes roofing. On the other hand, Nipah palm leaves and thatched grass are commonly used for the roof covering, providing insulation and protection from rain.

Moving on to the layout of the traditional Malaysian house, it is typically simple and functional. It often consists of a single large room for the living and sleeping area, with a raised platform at one end for dining and socializing. The kitchen and bathroom are usually located separately from the main living space, connected by a covered walkway. This separation is due to cultural and hygienic considerations.

The traditional Malaysian house is rich in symbolism and reflects cultural beliefs of the people. For example, the roofs of some houses are designed with curved, sweeping lines, resembling the wings of a bird, as a symbol of protection and freedom.

Questions 17 to 24

Complete the following table.

Choose **no more than four words** *from the text for each answer. For each question, write your answer in the space provided.*

Part 4

Read the text and answer questions 25 to 32.

Malaysian Women's Badminton Pair

Malaysia's badminton partnership of Thinaah Muralitharan and Pearly Tan gained significant attention after securing their first World Tour title in Switzerland early 2021. Moreover, their victory in the Super 300 title made history, as they became the second women's doubles pair from Malaysia to achieve such success since their seniors, Chow Mei Kuan and Lee Meng Yean, won the Syed Modi International in 2018. This triumph has caused a lot of excitement throughout Malaysia, where women's doubles have not been a strength of the badminton-crazy Asian nation.

Beyond their exceptional on-court performance, their partnership symbolises the nation's diverse multicultural society, with Thinaah being of Indian descent and Pearly of Chinese descent. Despite their cultural backgrounds, the Malaysian duo have diligently worked on building their partnership, aiming for an Olympic debut and bridging the gap through communication in a mix of three languages.

Impressively, Thinaah possesses fluently in four languages: English, Malay, Tamil, and Chinese Mandarin. This linguistic prowess not only reflects her versatility but also provides her and Pearly with a unique advantage on the court.

Currently ranking in the top twenty globally, Thinaah and Pearly have set their sights on their main target: competing in the prestigious Paris 2024 Olympic Games. For Pearly, this opportunity would be a dream come true, having been inspired by her now-retired hero, Lee Chong Wei, who captivated the world with his Olympic matches against Lin Dan. She aspires to follow in his footsteps and bring pride to her country through her badminton mastery.

Questions 25 to 32

Answer the questions below.
Choose **no more than five words and/or a number** *from the text for each answer.*

25 Thinaah Muralitharan and Pearly Tan won _____ in Switzerland. [1 *mark*]
