

Multiple Choice Activity: Which Technique is used in each Paraphrase

Instructions: Use the following quote and read each paraphrase, select which technique was used to write it

“Climate change has also put the integrity and survival of many species at stake due to shifts in optimum temperature ranges, thereby accelerating biodiversity loss by progressively changing the ecosystem structures.” (Abbass et al., 2022)

1. Global warming is jeopardizing the viability of numerous organisms due to shifting ideal temperature zones, resulting in a swift depletion of biological diversity by altering ecological structures.
2. Climate change endangers many species due to rising temperatures, causing biodiversity loss and ecosystem disruption.
3. Climate change, due to rising temperatures, is endangering many species. This is causing ecosystem disruption and a rapid loss of biodiversity.
4. The integrity and survival of many species have been put at stake due to shifts in optimum temperature ranges caused by climate change, thereby accelerating biodiversity loss by progressively changing the ecosystem structures.
