NATURAL SCIENCE

PARTS OF A PLANT

1. Drag and drop the parts of the plant to the right place. Then, choose the right function for each.

stem | flowers | roots | leaves | fruits

LIVEWORKSHEETS

2. Match the drawings with the parts of the plant. Then, match each part with its function.

stem

flowers

roots

leaves

It transports water and minerals to the leaves

They take water and minerals from the ground

They make food for the plant

They can be many different colours..

Photosynthesis happens here.

They have got pollen.
