VZOREC:

The diagram illustrates the VZOREC formula. On the left, an orange square is shown. To its right is an equals sign followed by a fraction. The numerator of the fraction is an orange square, and the denominator is another orange square. Arrows point from these orange squares to various gray boxes: the top orange square points to a box in the top right; the bottom orange square points to a box in the bottom right; and the left orange square points to a box in the bottom left. There are also gray boxes in the top right and bottom right that are not pointed to by arrows.

$$v = \frac{1}{\sqrt{\mu_0 \epsilon_0}} = \frac{1}{\sqrt{4\pi \times 10^{-7} \text{ H/m} \times 8.85 \times 10^{-12} \text{ F/m}}} = 3 \times 10^8 \text{ m/s}$$
