(공유 경제 시대의 도래)

viability	Collectively	the sharing economy
giving rise to	rent	is derived
taking advantage of	exclusive	consumption
access	collaborative consumption	mediation
satisfy	voluntary	

We are witnessing, across a wide range of domains, a shift away from the __독점적인__ ownership and consumption of resources to shared use and __소비__. This shift is __사용 중이다__ innovative new ways of peer-to-peer sharing that are __자발적인__ and enabled by Internet-based exchange markets and __중개__ platforms. Value __도출된다__ from the fact that many resources are acquired to __충족시키다__ infrequent demand but are otherwise poorly utilized (for example, the average car in the US is used less than 5% of the time). Several successful businesses, such as Getaround for cars and Spinlister for bikes, provide a proof of concept and evidence for the __실행가능성__ of peer-to-peer product sharing or __공동 소비__. These businesses allow owners to __임대하다__ on a short-term basis poorly utilized assets and non-owners to __접근하다__ these assets through renting on an as-needed basis. __총괄적으로__, these businesses and other manifestations of the collaborative consumption of products and services are __생기게 하고 있다__ what is becoming known as __공유 경제__.
