VI. Reading

How to Stay Healthy

When you are sick, your body does not feel good. You might have a fever or feel cold. Sometimes, you get a cough or sneeze. These are signs that your body is fighting germs. Germs can spread easily, so it is important to cover your mouth when you sneeze or cough.

If you feel pale or tired, it is good to rest. You should also take medicine if you have a cold or fever. This helps your body get better. Sometimes, if you hurt your skin or muscles, you can use a bandage to protect the area.

LIVEWORKSHEETS

Vaccination is also important. It can save your life by protecting you from dangerous diseases. To stay healthy, remember to eat well, sleep enough, and take care of your body.
