

## Practice Science

1. Using the words from the box, complete the summary about energy

### Forms of energy

- Energy can be classified in different ways according to the \_\_\_\_\_ in which it is involved
- Mechanical Energy : it is related to \_\_\_\_\_ and \_\_\_\_\_ of objects
- Heat Energy : It is Related to the \_\_\_\_\_ of objects, this form of energy is transferred from hotter objects to cooler ones.
- Sound Energy : it is related to \_\_\_\_\_
- Light Energy : it is related to \_\_\_\_\_
- Chemical Energy: It is Related to the \_\_\_\_\_ of materials or \_\_\_\_\_
- Nuclear Energy : it is related to \_\_\_\_\_ Substances , which release this type of energy spontaneously.
- Electric Energy : it is related to \_\_\_\_\_ many devices work with this form of energy
- Magnetic Energy : it is related to \_\_\_\_\_

Electricity -phenomena- sound -motion- light- magnetism-  
Substances – Position- radioactive- composition- temperature
