Date: _____

Topic 2-3
Quick CheckWrite **two** equations to match each array. Add the **rows** $\Rightarrow$. Then, add the **columns** $\downarrow$.

1.

$$\Rightarrow \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\downarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$$

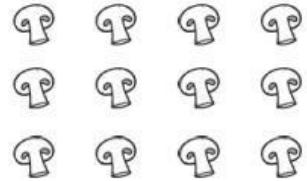

2.

$$\Rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\downarrow \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

3.

$$\Rightarrow \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\downarrow \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

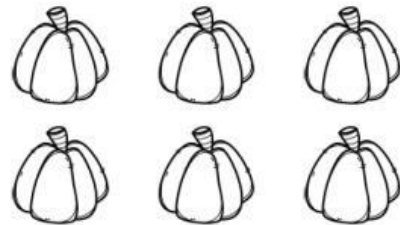

Use the arrays to find the missing numbers.

4.

$$\downarrow \underline{2} + \underline{\quad} + \underline{2} + \underline{2} + \underline{\quad} = \underline{10}$$

5.

$$\Rightarrow \underline{3} + \underline{\quad} = \underline{6}$$
