

LO: To be able to divide using a written method without a remainder.

Answer these questions in your maths books. Use the short bus-stop method.

How many times does 3 go into 5?

It goes into 5 once and has a remainder of 2.

$$57 \div 3 = 19$$

$$\begin{array}{r} 19 \\ 3 \overline{) 57} \end{array}$$

How many times does 3 go into 27?

It goes into 27 nine times and has no remainder.

| Challenging   | More challenging | Superstar material |
|---------------|------------------|--------------------|
| $21 \div 3 =$ | $65 \div 5 =$    | $128 \div 8 =$     |
| $44 \div 4 =$ | $36 \div 3 =$    | $104 \div 4 =$     |
| $48 \div 2 =$ | $85 \div 5 =$    | $96 \div 6 =$      |
| $46 \div 2 =$ | $48 \div 2 =$    | $105 \div 5 =$     |
| $48 \div 4 =$ | $42 \div 6 =$    | $150 \div 3 =$     |
