

LO: To be able to divide using a written method without a remainder.

Answer these questions in your maths books. Use the short bus-stop method.

How many times does 3 go into 5?

It goes into 5 once and has a remainder of 2.

$$57 \div 3 = 19$$

$$\begin{array}{r} 19 \\ 3 \overline{) 57} \end{array}$$

How many times does 3 go into 27?

It goes into 27 nine times and has no remainder.
