PART 2

You should spend about 15 minutes in this part.

Read the text below and correct the underlined errors. For each question, write the correct word in the space provided on your answer sheet.

3D Printing

3D printing is **(0)** a amazing way of building things. Instead of using ink on paper, 3D printers **(9)** used special materials like plastic or even metal to build objects layer by layer. It's like building with Lego **(10)** so with a machine doing the work. Imagine you want to make a toy car. With 3D printing, you can design the car **(11)** at a computer then send it to the printer. The printer **(12)** may follow your design and slowly create the car. It will add each tiny detail until it's complete. You can even make things that move, like a **(13)** spin top or a robot. People use 3D printers to create all sorts of things, from toys to tools **(14)** or even replacement parts for machines. It's changing the way **(15)** our make stuff, making it easier for anyone to turn their ideas into real-life objects. So, **(16)** what knows, maybe one day you'll be a 3D printing wizard too!
