### Wikipedia

Wikipedia is an online encyclopedia project. Its name is a mix of *wiki* and *encyclopedia*. *Wiki* is the Hawaiian word for quick, and encyclopedias are books with lots of facts or information. Wikipedia is a website with lots of information. It has more than 30 million articles in 290 languages. You can find information about almost anything in Wikipedia. It's a good place to start research. But the website says that it's not a good place to *finish* research. Why? Because anyone can change the website. Sometimes you can find unreliable information there.

1. There are a lot of facts on the Wikipedia website.
