

Representation of Rational Numbers

Write any two equivalent values of the following rational numbers

1. $\frac{5}{7} =$ _____ , _____	2. $\frac{-1}{16} =$ _____ , _____
3. $\frac{4}{9} =$ _____ , _____	4. $\frac{2}{7} =$ _____ , _____
5. $\frac{3}{11} =$ _____ , _____	6. $\frac{6}{5} =$ _____ , _____
7. $\frac{-4}{5} =$ _____ , _____	8. $\frac{7}{-3} =$ _____ , _____
9. $\frac{2}{11} =$ _____ , _____	10. $\frac{31}{-4} =$ _____ , _____

Simplify the following rational numbers

1. $\frac{45}{75} =$ _____	2. $\frac{-15}{12} =$ _____
3. $\frac{-5}{25} =$ _____	4. $\frac{42}{78} =$ _____
5. $\frac{13}{65} =$ _____	6. $\frac{56}{72} =$ _____
7. $\frac{-124}{28} =$ _____	8. $\frac{72}{-36} =$ _____
9. $\frac{22}{11} =$ _____	10. $\frac{96}{-64} =$ _____
