

## Minimalist Marvels: Capsule Hotel Rooms

Capsule hotels are popular in busy cities where space is limited, offering guests a compact and convenient place to stay. Each guest has their own small room, or capsule, designed to provide just enough space for resting and privacy. These capsules are usually arranged in rows, one above the other, like (1)\_\_\_\_\_ in a beehive.

Inside the capsule, the first thing you notice is the bed, which takes up most of the space. The bed is a single mattress, often placed directly on the floor of the capsule. There is enough room to sit up, but not to stand. The mattress is comfortable, with a soft (2)\_\_\_\_\_ and pillows provided. A small (3)\_\_\_\_\_ is usually placed beside the bed to hold personal items such as a phone or wallet.

One of the key features of the capsule is the (4)\_\_\_\_\_ door, which can be closed for privacy. These doors are typically made from lightweight materials and can either slide or roll down. Although the space is small, there is often a small control panel on one side of the wall. This panel allows guests to adjust the (5)\_\_\_\_\_ inside the capsule, turn on a light, or charge their devices. Each capsule is equipped with a reading light, which can be adjusted to different levels of brightness.

A (6)\_\_\_\_\_ is also provided to help block out any light from outside, allowing guests to sleep comfortably. There is no need for a window, as the capsule is designed to be a quiet and dark space for rest.

For other necessities, there are usually shared facilities outside the capsules. Guests will find (7)\_\_\_\_\_, showers, and sometimes even a lounge area where they can relax or socialize. Some capsule hotels also offer lockers where guests can store their (8)\_\_\_\_\_, as there isn't enough room in the capsule itself for large suitcases or bags.

Capsule hotels are known for their efficiency, and everything in the capsule is designed to maximize space. Instead of large furniture, guests have small storage compartments or (9)\_\_\_\_\_ built into the walls. These are perfect for keeping smaller items like books, glasses, or a bottle of water.

Overall, a capsule hotel room provides everything a guest needs for a short stay, offering a compact and organized space. While it may seem unusual to sleep in such a small area, these capsules provide both (10)\_\_\_\_\_ and comfort, making them a popular choice for travelers looking for a budget-friendly and efficient place to rest.
