The last two decades have seen enormous changes in the way people's lives are affected by IT. Twenty years ago, few people had access to a computer while today **(24)** _____ people use them at work, home or school and use of e-mail and the Internet is an every day event.

These developments have brought many benefits to our lives. E-mail makes communication much easier and more immediate **(25)** _____ has numerous benefits for business, commerce, and education. The World Wide Web means that information on every conceivable subject is now available to us. Clearly, for many people this has made life much easier and more convenient.

(26) _____, not all the effects of the new technology have been beneficial. Many people feel that the widespread use of e-mail is destroying traditional forms of communication such as letter writing, telephone and face-to-face conversation. With ever increasing use of information technology these negative elements are likely to increase in the future.

In addition, the huge size of the Web means it is almost impossible to control and regulate. This has led to many concerns regarding children **(27)** _____ unsuitable websites. Yet perhaps the biggest threat to IT in years to come will be the computer virus-more sophisticated or more destructive strains are almost inevitable. Conclusion, developments in IT have brought many **(28)** _____, yet I believe developments relating to new technology in the future are likely to produce many negative effects that will need to be addressed very carefully.

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 27 to 31.

Normally a student must attend a certain number of courses in order to graduate, and each course which he attends gives him a credit which he may count towards a degree. In many American universities the total work for a degree consists of thirty-six courses each lasting for one semester. A typical course consists of three classes per week for fifteen weeks; while attending a university a student will probably attend four or five courses during each semester. Normally a student would expect to take four years attending two semesters each year. It is possible to spread the period of work for the degree over a longer period. It is also possible for a student to move between one university and another during his degree course, though **this** is not in fact done as a regular practice.

For every course that he follows a student is given a grade, which is recorded, and the record is available for the student to show to prospective employers. All this imposes a constant pressure and strain of work, but in spite of this some students still find time for great activity in student affairs. Elections to positions in student organizations arouse much enthusiasm. The effective work of maintaining discipline is usually performed by students who advise the academic authorities. Any student who is thought to have broken the rules, for example, by cheating has to appear before a student court. With the enormous numbers of students, the operation of the system does involve a certain amount of activity. A student who has held one of these positions of authority is much respected and it will be of benefit to him later in his career. (Adapted from education.nsw.gov.au)

Question 29. According to paragraph 1, an American student is allowed _____.
A. to live in a different university.   **B.** to take a particular course in a different university.
C. to live at home and drive to classes.   **D.** to get two degrees from two different universities.

Question 30. American university students are usually under pressure of work because _____.
A. their academic performance will affect their future careers.   **B.** they are heavily involved in student affairs.
C. they have to observe university discipline.   **D.** they want to run for positions of authority.

Question 31. Some students are enthusiastic for positions in student organizations probably because _____.
A. they hate the constant pressure strain of their study.
B. they will then be able to stay longer in the university.
C. such positions help them get better jobs.   **D.** such positions are usually well paid.

Question 32. The student organizations seem to be effective in _____.
A. dealing with the academic affairs of the university.
B. ensuring that the students observe university regulations.

C. evaluating students' performance by bringing them before a court.

D. keeping up the students' enthusiasm for social activities.

Question 33. The word "this" in the first paragraph refers to _____.

A. moving between one university and another.　　B. attending two semesters each year

C. spreading the period of work for the degree over a longer period.

D. attending four or five courses during each semester.

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the questions from 34 to 40.

      ChatGPT is a state-of-the-art language model developed by OpenAI, which has become increasingly popular due to its versatility and ability to respond to natural language. Like any technology, ChatGPT has both advantages and disadvantages that must be taken into account.

      One of the main advantages of ChatGPT is its ability to process and respond to language in a natural and intuitive way. This makes it highly adaptable to a wide range of applications, such as virtual assistants, customer service chatbots, and language translation. **It**can also save time and money for companies by automating tasks that would normally require human labor. Another advantage of ChatGPT is its ability to continuously learn and improve through training on large amounts of data. This means that the model can become increasingly accurate and effective over time, leading to better user experiences and improved **efficiency**.

      However, there are also several potential disadvantages of ChatGPT that must be taken into consideration. One concern is the possibility of misuse or abuse of the technology, such as generating fake news or conducting cyberattacks like the current apps. This is especially concerning as the model can generate convincing text that is difficult to distinguish from human-generated content. Another concern is the potential for bias in the language model, as it is trained on data that may contain implicit biases or inaccuracies. This can lead to discriminatory responses or perpetuate existing biases, particularly towards **underrepresented** groups. Furthermore, the deployment of ChatGPT can also have an impact on the job market, as it may replace human workers in certain industries. This could potentially lead to job losses and exacerbate existing inequalities.

      In conclusion, while ChatGPT has numerous benefits in terms of language processing and machine learning, it is crucial to consider and address potential drawbacks such as the possibility of misuse, bias, and impact on the job market. To ensure the responsible development and deployment of this technology, it is important to prioritize ethics, transparency, and the creation of inclusive and equitable solutions.
