Tractor

What does the police officer drive?

Ambulance

Police Car

Mail Truck

What does the firefighter drive?

Fire Truck

Bus

Garbage Truck

What does the recycling worker drive?

Police Car

Ambulance

Garbage Truck

Learning About Community Helpers with QTROBOT

The QTrobot Community Helpers Curriculum is designed to help learners to acquire new vocabulary about the jobs, community buildings and vehicles and to develop social awareness about the situation they may meet a worker. Also it provides some opportunity to practice the situations they may need help from a worker, getting them ready and prepared to interact with one.

The goal of teaching about the community helpers with this curriculum is to help learners about how to:

- Recognize and name key workers, vehicles and buildings
- Match workers to the appropriate vehicles, work place and tools
- Categorize workers by their general roles in society
- Decide the appropriate worker for a given situation
- Interact with helpers in various situations such as a doctor or a dentist appointment
