

I. Label the parts of the plant

roots	flower	leaf
fruit	stem	

2. The life cycle of the plant:

organize the stages of the life cycle of the plant.

3. Choose the things a plant needs to live

 <p>sunlight</p>	 <p>a teddy</p>	 <p>nutrients</p>
 <p>a ball</p>	 <p>air</p>	 <p>water</p>

4. In a piece of paper, draw a thriving garden with all its important elements: living and non-living.
