

Each line has a missing word. Put the word appropriately.

L1 Several actions can contribute environmental protection. One effective  
L2 measure can be adopted is to reduce waste by choosing reusable items over  
L3 single-use products. Fact, using items like reusable bags, bottles, and  
L4 containers can significantly decrease the amount of plastic waste ends up in  
L5 landfills. Another practical solution is to plant trees. This because trees help  
L6 capture human-made emissions and provide oxygen, people can enjoy better  
L7 air quality and a healthier environment. It is also to use public transportation  
L8 for long distances and walk for short distances instead choosing private  
L9 vehicles. By doing so, people can their carbon footprint and decrease air  
L10 pollution, as they can limit the exhaust fumes emitted personal  
L11 vehicles. Again, by waste through reusable items, trees, and using public  
L12 transportation or walking, individuals can make a significant positive on the  
environment.
