

(iii) State a conclusion for your results.

.....  
.....  
.....[1]

(b) State **two** variables which were kept constant in this experiment.

1 .....  
2 .....  
[2]

(c) One way of improving the method used in this investigation would be to repeat it a number of times.

Identify **two other** sources of error in this investigation.

For each error, suggest an improvement to minimise the effect of the error.

error 1 .....  
.....

improvement 1 .....  
.....  
.....

error 2 .....  
.....

improvement 2 .....  
.....  
.....
