5 Complete the passage with the words below.

*long-term effect • sustainable • global warming • environmentally friendly • litter •
green features • get rid of*

Environmental Science

Many schools offer courses in environmental science. This gives students an understanding of important issues like ¹. Students learn which products and materials are ². and which energy sources are ³. The course encourages students to implement as many ⁴. as they can in their homes, such as the use of solar panels. Although the students don't ⁵. the streets and parks in their area, they are taught how to properly ⁶. their rubbish by using appropriate rubbish bins for different materials. Hopefully, this course will have a on many people who will play an important part in keeping our planet safe.
