5. Read the following passage and mark the letter A, B, C, or D to indicate the correct answer to each of the questions.

Did you know that on average we forget about 80% of the medical information a doctor might give us? This fascinating information came to light as a result of a study carried out by Utrecht University. What is even more interesting is that almost half of what we think we remember is wrong.

Why do you think this is? Well, it's not as **complicated** as you may think. You see, going to the doctor fills most people with anxiety and when we are really nervous and stressed we are more likely to focus on the diagnosis rather than the treatment. Therefore, we know what is wrong with us but have no idea what to do about it.

Here are some good tips to keep in mind when seeing a doctor. Always write down any important information. What would be even better is, if your doctor agreed, to record your consultation. This way, you can replay the advice at home, where you are more likely to **absorb** it. If you believe the situation is serious or you're really worried, seek the help of a family member. Just ask them to accompany you to listen in. This way you can be absolutely sure about what the doctor has told you and avoid falling into the same trap that most people do.

A. digest B. inhale C. swallow D. take in
5. The author suggests recording the consultant in order to _____.
A. play it to your family members to get their opinions
B. refer to it later to better understand your condition
C. replay it to write down any important information
D. use it as evidence against your doctor if necessary

6. Read the following passage and mark the letter A, B, C, or D to indicate the correct answer to each of the questions.

Except for a few unfortunate individuals, no law in this world can go against the fact that for most of us our family is an essential part of our lives. The moment you enter this cruel world, where each man is for himself, there are some near and dear ones out there who will do anything to ensure your happiness.

We are nothing more than a vulnerable and fragile object, without someone taking care of us on our arrival in this world. Despite all the odds, your family will take care of your well-being, and try their best to provide you the greatest comforts in the world. No one out there, except your family must forgive the endless number of mistakes you may make in your life. Apart from teaching you forgive and forget lessons, they are always there for you, when you need them the most.

Family is the only place where children study a lot after school. In school, teachers teach children about the subjects which will help them to find a good job in future. But at home, parents teach children about good habits. **They** are not only the elements which help the children to shape their personalities but they also prepare them a sustainable and bright future.

A good family makes a greater society. Father, mother, children have to work in order to build a strong family. If any one of them fail, the whole family may collapse. The good name of the whole family can be ruined by a single member of the family. In order to avoid that unhappy scenario, every family

member has to work hard and try their best. As a result, they will set good examples for the whole society. Families impacts very much on society and societies create countries.
