

Watch the short and answer the questions:

[Music on Mars: Will.i.am's Historic Moment #marsmusic #nasa #curiosityrover](#)

1. What breakthrough was recorded in 2012?
2. What was the rover on Mars named?
3. Who launched it?
4. What is the nickname Mars goes by?

Listen to the song and fill in the blanks with the right words:

[Reach For The Stars Music Video](#)

Why they say the sky is the limit
When I've seen the 1.....on the moon
Why do they say the sky is the limit
When I've seen the footprints on the Moon
And I know the sky² be high
But baby it ain't really that high
And I know that Mars might be³
But baby it ain't really that far
Let's reach for the stars
Reach for the stars
(Repeated chorus)
Can't nobody hold us back
They can't hold us down
They can't keep us back
Tie us to the ground
Told your people that we don't
4.....
When we're trying out
Please don't 5.....
We will turn it up
Louder than it was before
Like the lion at the jungle, you can hear us 6.....
When I lie hear, it's like a sonic
7.....

Flying just like NASA, out of
8.....
Hands up, reach for the stars
Hands up, get 'em up high
Hands up, if you really feel alive
9.....
Why they say the sky is the limit
When I've seen the footprints on the moon
Why do they say the sky is the limit
When I've seen the footprints on the Moon
And I know the sky might be high
But baby it ain't really that high
And I know that 10..... might be far
But baby it ain't really that far
Let's reach for the stars
Reach for the stars
(Repeated chorus)
