Comparing Exponents Step-by-Step Lesson

Compare the following values using the >, <, or = symbols.

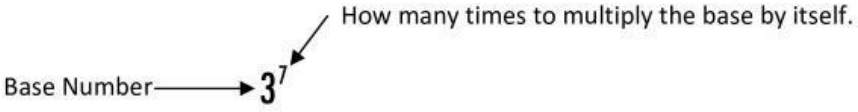

$$7^3 _____ 3^7$$

Explanation:

Step 1: Determine the value of each side.

This tell us that we multiply 7 by itself 3 times or 7 x 7 x 7.

This tell us that we multiply 3 by itself 7 times or 3 x 3 x 3 x 3 x 3 x 3 x 3.

As it stands now we are comparing: 7 x 7 x 7 to 3 x 3 x 3 x 3 x 3 x 3 x 3.

Find the products of each side:

7 x 7 x 7 = 343

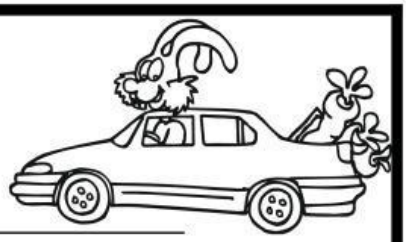

3 x 3 x 3 x 3 x 3 x 3 x 3 = 2,187

Step 2: Compare the values using symbols. We can see that the left side is much **less than** the right side or

$$7^3 < 3^7$$

343 2,187
