

The Invention of the Sandwich

I love sandwiches!

They are so delicious and so easy to prepare. If you are really in a hurry, you can grab a loaf of bread and a couple of slices of ham and... presto! You have prepared a delicious, ready-to-eat ham sandwich in less than a minute. How cool is that?

In fact, the sandwich is one of the most important dishes ever invented. *The Wall Street Journal* even described it once as "Britain's biggest contribution to gastronomy". Can you imagine that?

Yes, the sandwich came from Britain. It was invented by the Earl of Sandwich, whose real name was John Montagu. Sandwich was where he lived. They say he was a compulsive gambler. In fact, he was so addicted to gambling that he simply could not stop doing it! He would sit at a table and gamble for hours and hours and hours. Often he would forget to eat at all.

One day, he took a piece of meat and wrapped it inside a couple of slices of bread and went off to gamble. On that immortal day, the sandwich was born.

People remember the Earl of Sandwich for his wonderful invention! Me, I'm going to celebrate him by preparing myself a bacon, lettuce, and tomato sandwich right here, right now. Hmm, I just love the smell of crispy bacon frying. Yum!

1.- Read the passage and drag the answers to the questions:

Who invented the sandwich? _____

Why would he forget to eat? _____

Where was he born? _____

What are the ingredients in a BLT sandwich? _____

2.- Read the Sentences and drag the Subject pronouns and the verb (the action) to it's correct column.

1. I love sandwiches.
2. They are so delicious and so easy to prepare.
3. You have prepared a delicious, ready-to-eat ham sandwich in less than a minute.
4. They say he was a compulsive gambler.
5. He would sit on a table and gamble for hours and hours and hours.
6. That immortal day, the sandwich was born.
