

WHILE WATCHING

3  Read the questions. Watch the video and take notes. Then discuss the questions with a partner.

- 1 How have doctors used electricity in the past?
- 2 What was the main finding of researchers at Northwestern University?
- 3 How painful is electrical stimulation?

4  Watch again. Answer the questions.

- 1 What conditions does the device have the potential to treat?
- 2 What condition is the device currently used to treat?
- 3 What part of the brain does the device stimulate?
- 4 How old were the subjects in the Northwestern study?
- 5 During the study, how long did it take to see benefits? How long did these last?
- 6 What are the key questions for further research?
