

HIGH IN THE SKY

Hi. My name is Jenny Siebold and I'm a pilot. I love my job because I see many beautiful countries and I meet lots of interesting people.

My Day

5 Every day is different, but some things are always the same. For example, before takeoff¹, it is my job to go over the flight plan. I have to make sure that it is safe to fly.

Takeoff

10 Takeoff is the best part of the flight. I love to go up in the air and watch the ground become smaller and smaller. It is always so exciting!

In the Air

During the flight, I communicate with the people in the air control tower². They tell me what to do if there is bad weather on the way. They also tell me when and where I can land the plane.

15 Landing

Just before landing the plane, I talk to the passengers. I tell them what the local time is and what weather they can expect. And, of course, I always say, "Thank you for flying with my company."
