Activity

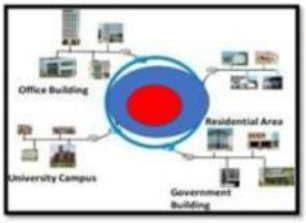
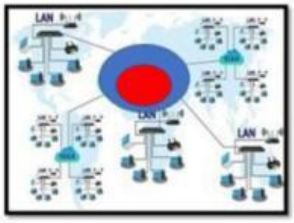
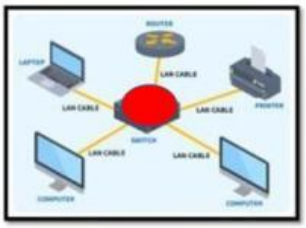
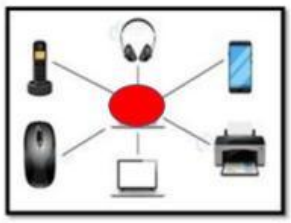
DOK 2: Differentiate between various types of networks.









A small network for personal devices, like a smartphone and laptop, within a few meters.	A network that connects devices in a limited area, like a home, office, or school, allowing fast data sharing.	A larger network that covers a city or campus, connecting multiple LANs over a wider area.	A network that spans large distances, like across cities or countries, connecting multiple LANs and MANs (e.g., the internet).
