

1

The water cycle.

Look at the diagram of the water cycle on page 2 of the Classbook. The following text has been left out of the diagram.

Look at the arrows in the diagram and write **a**, **b**, **c** or **d** next to the correct text below.

☐ The water vapour rises and begins to cool down. As it cools, it condenses into tiny drops of water which make clouds.

☐ The water returns to the sea in rivers.

☐ The clouds continue to rise and cool until the water droplets fall to earth as rain or snow.

☐ The sun heats the seawater which evaporates into the air as water vapour.
