The female reproductive system

The female reproductive system produces **egg cells** in the **ovaries** called **ova.**

Read and choose the organs.

1. They connect the ovaries to the uterus.
2. There's one on each side of the uterus. They produce egg cells.
3. This connects the vagina to the uterus.
4. The canal that connects the uterus and cervix to the outside of the body.
5. The organ where the fertilised egg develops into a fetus.

Label.

Vagina | cervix | uterus

Fallopian tubes | vulva | ovaries
