/ 6

G Reading: Recognizing and understanding paragraphs

Six sentences are missing from this text. Choose the correct sentence for each gap. There are three sentences you do not need.

How technology will change the world

I think that in 50 years' time, the world will be a very different place. We can predict this just by looking at current technology.

Firstly, we won't have to do housework because robots will do the chores. ¹ ____ For example, there might be one robot to wash the dishes, another to clean the floor, and another to do the laundry.

The robots will be programmed to do their work quicker than humans could do it. ² ____ Of course, we need to develop the right technology first, but I think this will be possible soon. There are already some quite advanced robots out there!

The Earth will probably become even more crowded than it already is and some people will choose to move to another planet. For this reason, I think that some humans will live on Mars.

The technology is already being developed.³ At the moment, experts say that the people who go to Mars will have to stay there, but in 50 years, people will be able to come back from Mars if they want to.

Also, everyone will eat liquid food! People will become busier and busier because they will have to work harder, so there won't be time to spend time eating. Scientists will develop a special liquid food that you can drink like water.⁴ We won't even have to do exercise!

We will not need fridges to keep our food.⁵ These will be stored in cupboards. I think the change will happen slowly, so we won't feel a big difference between now and then.

We won't have to go to school anymore. We will just connect a computer directly to our heads.⁶ It will attach to our brains and our brains will process the information without needing to think about it. It will be easy to do this at home, while we are sleeping, or while we are on public transport.

Life will be completely different!

- A This will save humans a lot of time which they can spend doing other things.
- B There are some plans to send people there in the next ten years.
- C It will be liquid or solid, and people will be able to choose what they prefer.
- D It will give us all the information we need.
- E This is unlikely to change in the future.
- F There will be different ones to do different types of work.
- G It will have all the right ingredients for humans to stay healthy.
- H These will have special doors, which ones at the moment don't have.
- I They won't exist because the liquid food will be kept in bottles.
