

## Worksheet 2

### Estimating, measuring and comparing capacity

Refer to Textbook page 107

1. Jane fills Containers A, B and C completely with water. Then she pours all the water from these containers into 1-litre bottles as shown below. Fill in the blanks with the correct answers.

Container A

Container B

Container C

(a) The capacity of Container A is \_\_\_\_\_ l.

(b) The capacity of Container B is \_\_\_\_\_ l.

(c) The capacity of Container C is \_\_\_\_\_ l.

(d) The capacity of Container D is 5 times that of Container A.

The capacity of Container D is \_\_\_\_\_ l.

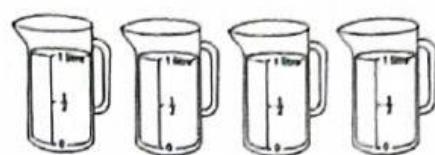

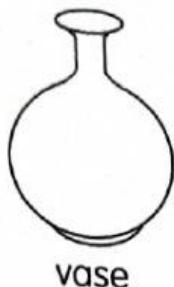

## Putting It Together 1

### Further Practice

1. Fill in the blanks.

(a)

vase

The capacity of the vase is about \_\_\_\_\_ l.

(b)

pot

The capacity of the pot is about \_\_\_\_\_ l.

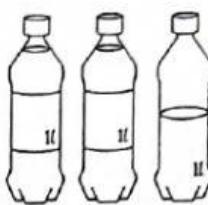

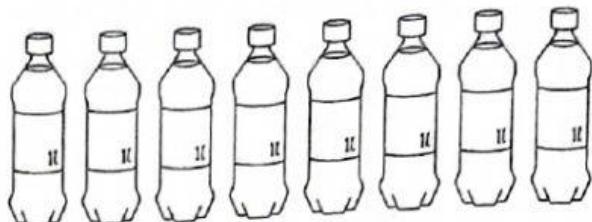

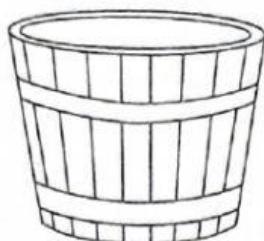

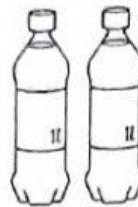

(c)

basin

The capacity of the basin is about \_\_\_\_\_ l.

2. Look at the pictures. Then answer the questions.

(a) What is the difference in capacity between the tub and the vase? \_\_\_\_\_ l

(b) What is the difference in capacity between the vase and the jar? About \_\_\_\_\_ l

(c) How many full vases of water are needed to fill an empty tub completely? \_\_\_\_\_

(d) Arrange the containers in order. Begin with the container that has the **largest** capacity.

largest
