EXPLORING THE ANIMAL KINGDOM

"Animals come in many shapes and sizes, and each one is unique in its own way! Some animals are bigger and stronger than others. For example, elephants are much larger than lions, and they use their strong trunks to pick up heavy things. But when it comes to speed, cheetahs are way faster than elephants and can run faster than almost any other animal on land! Giraffes are taller than most animals with their long necks, which help them reach leaves high in trees.

Meanwhile, rabbits are smaller and quicker, which makes it easier for them to hide from predators. In the ocean, sharks are stronger and better hunters than most fish, Each animal is special, whether it's bigger, faster, stronger, or smarter than others, making the animal kingdom an exciting place to explore!

Drag the comparative adjectives from the list into the correct blanks in the sentences based on the text above

1. Elephants are _____ than cheetahs, but cheetahs are _____ than elephants when it comes to running.
2. Giraffes have _____ necks than zebras, which helps them reach leaves high up in trees.
