Term 1 Exam

Soufriere Primary School Grade 4

Events

Read the code and drag the letters to answer the questions.

```
when run
  set background to [dark blue sky with stars]
  make new [star] sprite at (54, 219)
  make new [planet] sprite at (298, 211)
```

7 Which event makes a burst effect with 25 robot sprites?

8 Which one of these is an Event Handler?

A

```
when [star] clicked
  sprite [star] begins moving east
```

B

```
when [star] touches [planet]
  create burst effect with 25 robot sprites
```

9 Which sprite will move when clicked? (Select the correct answer.)

- A Only the orange planet sprite will move. C None of the sprites will move.
B Both sprites will move. D Only the star sprite will move.

Conditional Statements

Read the code and select the correct command in the conditional statement to answer the question.

10 Which command block goes into the conditional statement shown below?

```
when run
  repeat 3 times
    do [move forward]
  if [nectar] = 1
    do [ ]
```

- A get nectar
B make honey
C move forward

When you click finish:
