Burial, carvings, cave, ornaments, Paleolithic, sculptures, rituals

5. Put the seven stages of human evolution in the correct order

1.	Ramapithecus
2.	Homo Habilis
3.	Homo Sapiens
4.	Australopithecus
5	H.S. Neanderthalensis
6.	Homo Erectus
7.	Dryopithecus

6. Match each characteristic with its corresponding stage.

Australopithecus		Existed around 14 to 9 million years ago during the Miocene.
Homo Habilis		They have the ability to survive in cold environments due to their robust bodies.
Homo Sapiens		They also possessed advanced cognitive abilities, complex societies, and efficient tool-making skills.
Dryopithecus		It is a genus of small-bodied and small-brained. 'Lucy'
H.S. Neanderthalensis		The first relatives of modern-day human beings because of human-like structures.
Homo Erectus		"Handy Man". They earned this title due to their ability to modify stones into tools for various tasks
Ramapithecus		Due to their more upright posture and the ability to move through trees.

7. True or false

- a. The Neolithic era is also called the New Stone Age.____
- b. It started around 20,000 years ago and ended when metal tools were invented.____
- c. This era marked a major change in how people lived.____
- d. Neolithic people did not make better tools from polished stone.____
