

Bismillahirrahmanirrahim

A. Kerjakanlah soal-soal berikut dengan tepat!

1. $\frac{2}{5} \times \frac{5}{8} = \frac{\boxed{\dots}}{\boxed{\dots}}$

6. $\frac{2}{5} \times 1\frac{2}{8} = \frac{2}{5} \times \frac{\boxed{\dots}}{\boxed{\dots}} = \frac{\boxed{\dots}}{\boxed{\dots}}$

2. $\frac{5}{6} \times \frac{2}{3} = \frac{\boxed{\dots}}{\boxed{\dots}}$

7. $\frac{4}{5} \times 4\frac{1}{4} = \frac{4}{5} \times \frac{\boxed{\dots}}{\boxed{\dots}} = \frac{\boxed{\dots}}{\boxed{\dots}}$

3. $\frac{4}{4} \times \frac{2}{5} = \frac{\boxed{\dots}}{\boxed{\dots}}$

8. $4 \times 3\frac{1}{6} = 4 \times \frac{\boxed{\dots}}{\boxed{\dots}} = \frac{\boxed{\dots}}{\boxed{\dots}}$

4. $2 \times \frac{4}{6} = \frac{\boxed{\dots}}{\boxed{\dots}}$

9. $1 \times 1\frac{1}{3} = 1 \times \frac{\boxed{\dots}}{\boxed{\dots}} = \frac{\boxed{\dots}}{\boxed{\dots}}$

5. $\frac{1}{10} \times 10 = \frac{\boxed{\dots}}{\boxed{\dots}}$

10. $5\frac{7}{4} \times 6 = \frac{\boxed{\dots}}{\boxed{\dots}} \times 6 = \frac{\boxed{\dots}}{\boxed{\dots}}$

B. Jawablah pertanyaan berikut dengan tepat!

Rudi membeli sekantong mangga dengan berat $\frac{3}{4}$ kg
dan sekantong manggis dengan berat $2\frac{1}{4}$ kg.

- Jika Rudi membeli 5 kantong mangga, berapakah berat seluruh mangga tersebut?

$$\frac{\boxed{\dots}}{\boxed{\dots}} \times 5 = \frac{\boxed{\dots}}{\boxed{\dots}} \text{ kg}$$

- Jika Rudi membeli 3 kantong manggis, berapakah berat seluruh manggis tersebut?

$$\boxed{\dots} \times \frac{\boxed{\dots}}{\boxed{\dots}} = \frac{\boxed{\dots}}{\boxed{\dots}} \text{ kg}$$
