

The Amazing World of Dolphins

Dolphins are one of the most intelligent animals on Earth. They live in oceans and seas around the world. Dolphins are mammals, which means they breathe air and feed their babies with milk. They are friendly and love to play with each other.

Dolphins use sounds to communicate. They make clicks, whistles, and other noises to talk to their friends. Some dolphins can even learn tricks and follow instructions from humans.

Dolphins eat fish and squid. They swim very fast to catch their food. Did you know that dolphins sleep with one eye open? This helps them stay safe from danger.

Dolphins are amazing creatures that bring joy to many people. They remind us of the importance of protecting our oceans and the animals that live there.
