LONDON: Oxford Dictionaries recognized the power of the millennial generation on Friday with its 2017 word of the year: “youthquake”.

Oxford lexicographers say there was a fivefold increase in use of the therm between 2016 and 2017. It is defined as “ a significant cultural, political, or social change arising from the actions or influence of young people”.

The word, coined almost 50 years ago by Diana Vreeland, then the editor of Vogue magazine, has been used to describe phenomena including surging youth support for Britain’s Labour Party and the election of 30-something leaders in France and New Zealand.

Each year, Oxford University press tracks how the English language is changing and chooses a word that reflects the annual mood. Oxford Dictionaries president Casper Grathwohl said youthquake has “yet to land firmly on American soil, but strong evidence in the UK calls it out as a word on the move”.
