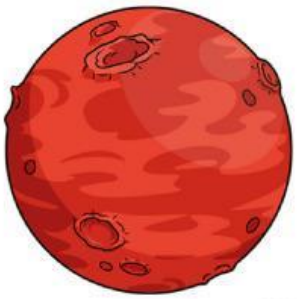
SOLAR SYSTEM

A. Join the pictures to the names of the planets.



Mars

Mercury

Saturn

Jupiter

Earth

LIVEWORKSHEETS

B. Drag the name of the planet and drop it next to the description that corresponds.

1. Is the fourth planet from the Sun, known as the "Red Planet" due to its reddish surface caused by iron oxide.

2. Is the smallest and closest planet to the Sun. It has a rocky surface, extreme temperatures, and no atmosphere to retain heat.

3. Is the sixth planet from the Sun, famous for its stunning ring system made of ice and rock. It's a gas giant composed mostly of hydrogen and helium, with at least 145 moons, including Titan, its largest moon.

4. Is the third planet from the Sun, the only known planet to support life. It has a balanced atmosphere, liquid water, diverse ecosystems, and a single moon.

Mars

Saturn

Mercury

Earth
