B1 Use of English

Multiple choice gaps

Parrots can solve puzzles!

Parrots are famous for their bright feathers and ability to mimic sounds, but they are also highly intelligent birds. Recent experiments have shown that parrots can solve complex puzzles, **(1)**_____ . they use tools to achieve a goal.

In one study, researchers gave parrots a series of tasks that required them to **(2)**_____ out how to access food placed inside a box. The birds had to pull strings, push levers, and even use sticks to **(3)**_____ the food. Surprisingly, the parrots completed the challenges without any prior training, demonstrating their **(4)**_____ for logical thinking and problem-solving.

This ability is believed to be linked to the parrot's need to survive in the wild, where finding food can often require **(5)**_____ strategies. The study suggests that parrots have mental **(6)**_____ comparable to some primates, making them one of the smartest groups of birds in the animal kingdom!
