

Identify the parts of the atom.

Match the subatomic particles to their charge.

Proton

Positive

Neutron

Negative

Electron

Neutral

Match regions of the atom to their charge.

Nucleus

Positive

Electron Cloud

Negative

Neutral

Fill in the blanks.

The _____ are responsible for the movement of electricity.

The job of the _____ is to hold the nucleus together.

The electrons do not fly off the atom because _____.

The number of electrons and protons are always _____ in a neutral atom.

Answer the following:

How many valence electrons does this atom of oxygen have?
