

## Reading

### 3 Read the questions and circle True or False.

The Earth is full of amazing places! Rivers are often longer than lakes, but oceans are the largest bodies of water on Earth. Lakes can be deeper than rivers, while waterfalls are some of the most beautiful sights, with water rushing from high cliffs. Mountains are higher than hills, and some are the highest points on Earth. Deserts, on the other hand, are very dry and often much hotter than forests. Some deserts are surprisingly wider than many countries! From the deepest ocean to the driest desert, the Earth is full of incredible places to explore.

- 1 Rivers are always longer than lakes.    **True**   /   **False**
- 2 Oceans are the largest bodies of water on Earth.    **True**   /   **False**
- 3 Waterfalls don't have water rushing from cliffs.    **True**   /   **False**
- 4 Hills are higher than mountains.    **True**   /   **False**
- 5 Deserts are drier than forests.    **True**   /   **False**
- 6 Lakes are the largest bodies of water on Earth.    **True**   /   **False**
- 7 Deserts can be bigger than countries.    **True**   /   **False**
- 8 Mountains can be one of the highest places on Earth.    **True**   /   **False**
