Changing Climates

The year-round weather in a place is called climate. It isn't the same for every place on the planet, and it usually changes with the seasons. In Southern Europe, for example, winters are usually mild. It often rains, but it doesn't snow much. Summers are generally dry and warm.

The Lut Desert in Iran is very hot and dry all year round. The temperatures there can be 70 degrees Celsius! Because of the extreme temperatures, some parts of the Lut desert have no life at all. Now you know why not many people go there!

It rains almost every day in Lloró, Colombia. Lloró gets an average of 13 meters of rain every year. That's a lot! The trees grow very quickly because of the wet climate.

In Oymyakon, Russia, winters are very long and cold. It snows all the time, and temperatures can be minus 70 degrees Celsius. Schools close only when the temperature is below minus 52 degrees Celsius!

Places with a good climate are very popular. But a lot of sun and high temperatures isn't everyone's idea of a good climate. Some people really like the cold or wet weather. So long as everyone's h[illegible]!
