A Such increases pre-date social media but they have clearly worsened since its arrival.

B Furthermore, the need to be appreciated is a crucial part of psychological well-being, unless it is taken too far and becomes a nonstop search to be valued by others.

C However, the danger is when these efforts to compensate are supported and rewarded by others.

D Then came reality TV, which turned the attention back to ourselves.

E New ‘self-help’ mathematical formulas could be built into Facebook, Twitter and Instagram.

F The explanation for this is that narcissistic individuals are much more likely to use social media to portray an enviable, if unrealistic, self-image, broadcasting their life to an audience and gaining many virtual friends.

G Interestingly, what they all seem to have in common is digital attention seeking.
