

Peter's Party

Peter (cook) in the kitchen for four hours.

He and his wife are having guests over for dinner tonight. He (work) hard to prepare the meal. He (prepare) an appetizer, a main course, and some salad, and now he is making the dessert. He is making a cake for dessert, and he (mix) the ingredients for ten minutes.

Now he just has to bake it for an hour. His wife (clean) for several hours as well. She (clean) the bathrooms, the living room, and the front hallway. Now she's cleaning the dining room. She (dust) the furniture for almost 20 minutes now. When Peter finishes cooking, she's going to help him clean the kitchen.

They (plan) this dinner party all week, but they left all the work until the last minute. They (work) so hard that they are exhausted now.

They are both very tired and would rather sleep tonight than have guests over.
