## Playing a musical instrument

Playing a musical instrument is a great hobby to have. I started playing the piano when I was five years old and still really enjoy it now: it's a perfect way to relax and cheers me up when I'm **feeling down**. When I lived at home with my parents, we had a lovely reddish brown piano in the house and I had piano lessons every week. However, when I went to university, I had to leave my family, my home and my piano behind.

I missed playing the piano so much that I spent all the money I got for my eighteenth birthday on a brand new electric piano. **It** was quite difficult getting it from the music shop to my house: I had to take a friend with me to get it into a taxi and then carry it to the door. I am very glad I bought it though. I was able to play whenever I wanted, using headphones so that I wouldn't disturb my flatmates. When I was studying or writing an essay, I used to take a break to play something energetically. It really helped ease my frustration! When I was feeling a bit homesick, playing music that I learned on my old piano made me feel better.
