My name is: _____

WORKSHEET

Date: FFs4	Teacher's feedbacks

Task 1:

Read the diary and write the missing words. Write one word on each line.

Tuesday

Example Today ....was.... the first day of our holiday.

1 We arrived ..... the airport late because we drove there and the roads were very busy. After we showed our tickets, we

2 waited for about half an ..... and then we got on the plane. I sat next to the window so I could watch everything and Mum sat next to me.

3 Dad had ..... sit behind us.

4 When we got to the island ..... was four o'clock in the afternoon.

Later we went to an expensive restaurant for dinner.

5 I ..... fish then chocolate ice cream!

Task 2: Read and answer the questions

The Solar System

The Solar System is a group of planets, moons, and other objects that orbit the Sun. The Sun is at the center of the Solar System and is a very hot, glowing ball of gas. It provides light and heat to all the planets.

There are eight planets in the Solar System. The four planets closest to the Sun are **Mercury**, **Venus**, **Earth**, and **Mars**. These are called the "rocky planets" because they are made mostly of rock.

The next four planets are **Jupiter**, **Saturn**, **Uranus**, and **Neptune**. These are called the "gas giants" because they are very large and made mostly of gas. Jupiter is the largest planet in the Solar System, and Saturn is famous for its beautiful rings.

The Solar System also has dwarf planets, like Pluto, and smaller objects, like asteroids and comets. These objects orbit the Sun, too.

Our planet, Earth, is the third planet from the Sun. It is special because it has air, water, and the perfect temperature for life.

1.What is at the center of the Solar System?

_____

2. How many planets are in the Solar System?

_____

3. Which planet is the largest?

_____

4. Why are Jupiter and Saturn called "gas giants"?

_____

5. What makes Earth special?

_____
