Birds

Example The three kinds of animalsthat..... can fly are birds, bats and
1 insects, birds are the best at flying. They can stay in
2 the air hours and hours and can fly over the tops of
3 mountains, through trees in dark jungles and the sea to
other countries.
4 On our planet, are lots of different kinds of birds.
5 are bigger than a person and other kinds are smaller
than a flower.
6 All birds from eggs which the mother looks after in a
7 nest. Birds usually make nests in trees from grass leaves.
8 When the baby birds have the eggs and they are still
9 in the nest, they are very hungry. The parents to find
10 hundreds of small insects for to eat.
When the babies are stronger, they leave the nests and fly away.
