II. Read the following passage and mark the letter A, B or C on your answer sheet to indicate the correct answer to each of the questions. (1m)

An extended family is a type of family structure that has more than two generations, such as grandparents, aunts, uncles, cousins and even distant relatives. This type of family can have both advantages and disadvantages.

One clear advantage of having an extended family is the family **togetherness**. With more relatives, there are more shoulders to cry on during difficult times, which creates a feeling of comfort and protectiveness.

Another advantage that an extended family can provide is that everyone shares responsibilities, such as child care support, adult care giving or housework sharing. Although the benefits of living in an extended family are real, it's important to consider some disadvantages this type of family structure might have. First, because there are many people sharing the same living space, it might be challenging to have **personal** space and enjoy privacy. Second, in an extended family, it might be difficult to make a decision that satisfies everyone because of different viewpoints and preferences.

Living in an extended family can be beneficial and challenging. It is important to find a balance between the pros and cons.
