Read the text and complete the activities.

Winter is a magical time of year, especially for children. When it snows, kids love to go outside and play in the snow. One of their favorite activities is building a snowman. They roll big snowballs to make the body and head, and then decorate it with a scarf, a carrot for the nose, and stones for the eyes and mouth. Some even put a hat on their snowman.

Another fun activity is sledding. Children take their sleds to a hill and slide down as fast as they can. They laugh and enjoy the cold, fresh air. Snowball fights are also very popular. Kids throw snowballs at each other and have lots of fun. Some children like to build snow forts to make the game even more exciting.

Ice skating is another favorite winter activity. Many children go to ice rinks or frozen ponds to skate with their friends. Skiing and snowboarding are also exciting. Families often go to the mountains to enjoy these sports. Even beginners can have fun learning how to ski or snowboard.

After playing outside, children often go indoors to get warm. They drink hot chocolate with marshmallows and sit by the fire. Winter is not just about playing outside — it's also about spending time with family and relaxing together.

Winter is a season full of fun and joy. Whether playing in the snow, skating on ice, or sitting by the fire, it's a special time to make happy memories.

1 Decide if the sentences are true or false.

1. Children enjoy building snowmen by using snowballs for the body and head. _____
2. Snowball fights are not very popular among children. _____
3. Families often go to the mountains for skiing and snowboarding. _____
4. Children drink tea with marshmallows after playing outside. _____
5. Winter is a season for fun, joy, and spending time with family. _____

2 Complete the sentences with the correct words.

1. Children decorate their snowman with a scarf, a carrot, and _____ for the eyes and mouth.
2. Kids like to build snow forts to make _____ fights more exciting.
3. Ice skating can be done at ice rinks or on _____ ponds.
4. Even _____ can enjoy learning how to ski or snowboard.
5. After playing in the snow, children often warm up by sitting near the _____.
